## Corruption Monitoring System: Features & Advantages

Mr. Ruslan Stefanov

Center for the Study of Democracy, Bulgaria  
Coordinator SELDI

SELDI Training Seminar on Corruption Monitoring  
8 November 2013, Skopje

**This project is funded by the European Union  
Instrument for Pre-accession Assistance (IPA) Civil Society Facility (CSF)**  
The views expressed in this presentation do not necessarily reflect the views of the European Commission

A project implemented  
by a consortium lead by  
the Center for the Study  
of Democracy

# Political preconditions to corruption research

## Why corruption is a problem

- The state belongs to the citizens and not to the bureaucracy
- The need for policies to match public needs
- Perception of a common good
- Democratic control over the government
- The need for political leaders to manage common affairs and not to be rulers

# Aspects (forms) of corruption

Corruption is not monolithic. Many of its forms could sometimes be accepted as “normal behavior”

- Administrative corruption
- Grand corruption (political level)
- Executive and legislative capture (state capture)
- Patronage, paternalism, clientelism and being a “team player”

# Concepts and indicators measured by the CMS

- **Administrative corruption**  
Incidence of corrupt practices in interactions between citizens and businesses with the administration and in public services
- **Type of corruption measured**
  - Corruption among lower and middle level officials;
  - The most widespread forms of “petit” corruption associated with gifts, favors and money
- **Excluded:** grand (political) corruption, state capture

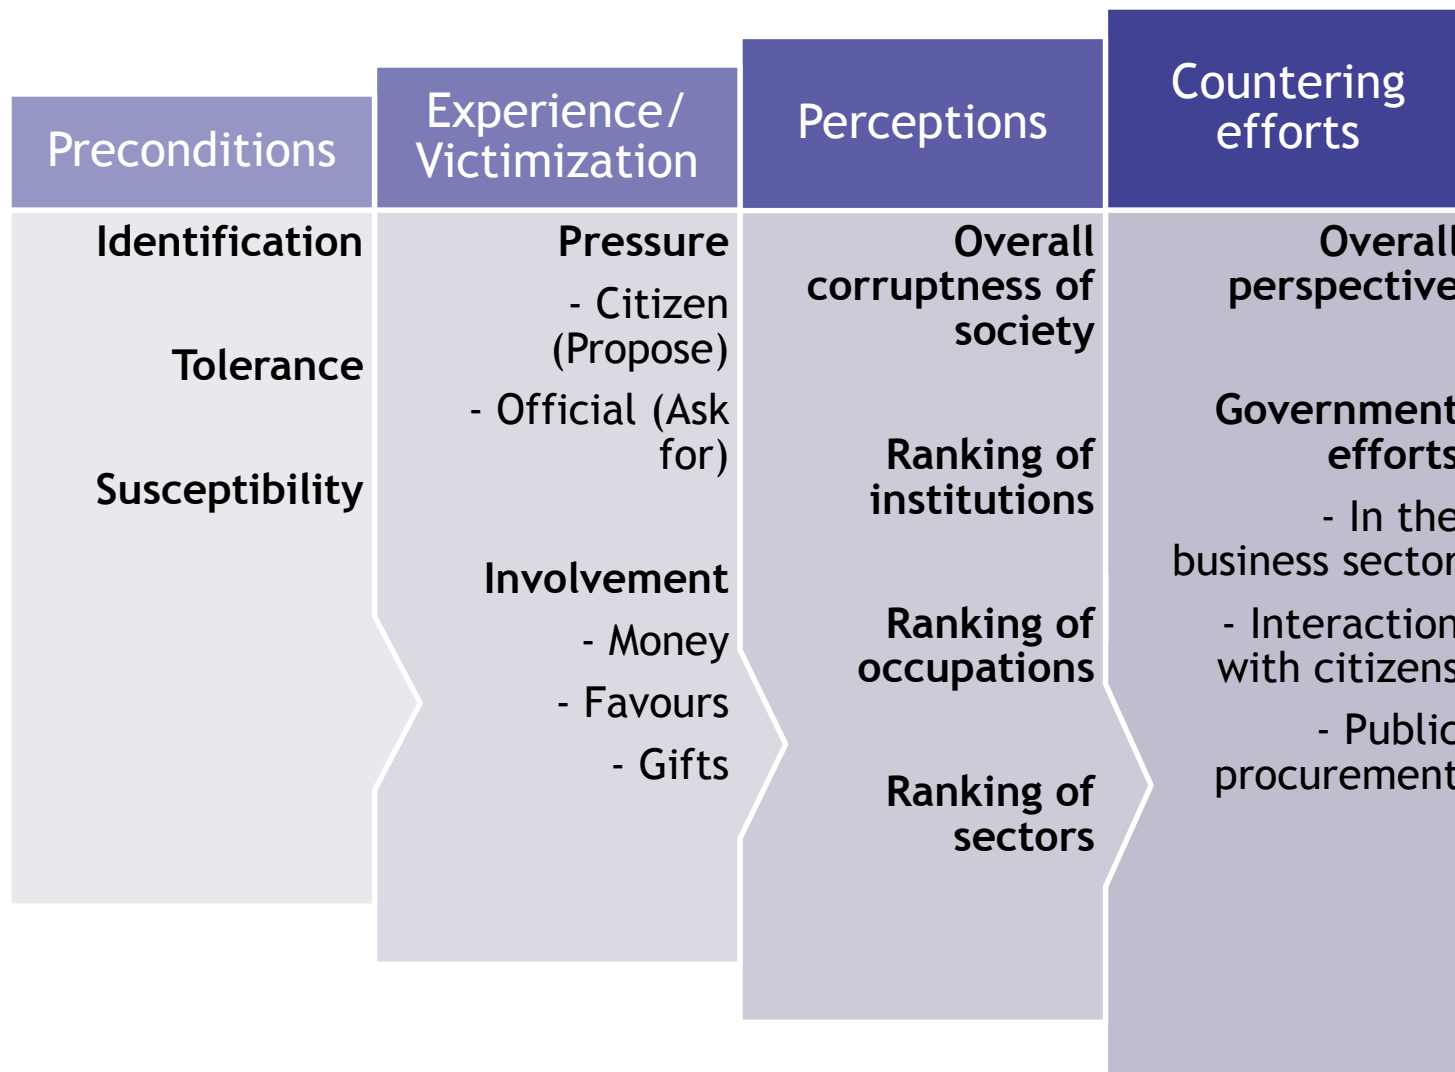

Can corruption be measured through surveys?

Yes, specific forms of corruption through:

- Interviews with stakeholders
- Review of institutional performance
- Audits of specific projects

Are corruption measures objective?

- Survey based measures are the **ONLY** available
- Distinction between experience and perception
- Need to adapt methodology to the specific sector studied

# Questionnaire for CMS Surveys

- English questionnaire is the master
- Please, review national questionnaires for language and update institutions, etc. Turkey - translate questionnaire
- Can add up to 5 most pertinent additional questions of the day - please, let us agree beforehand
- Showcase the questionnaire

# Methodology for Calculating Indexes

- Example from printed material
- SPSS files with the English names of variables will be sent out to partners => surveying agencies
- SPSS files with pre-defined calculations will be sent out to surveying agencies
- Surveying agencies should provide primary/raw data SPSS file and xls file => merge into a final unified file for analysis of data at regional level

## Preconditions

Identification

Assessments whether specific social situations (clear corruption) are identified as corruption

Tolerance

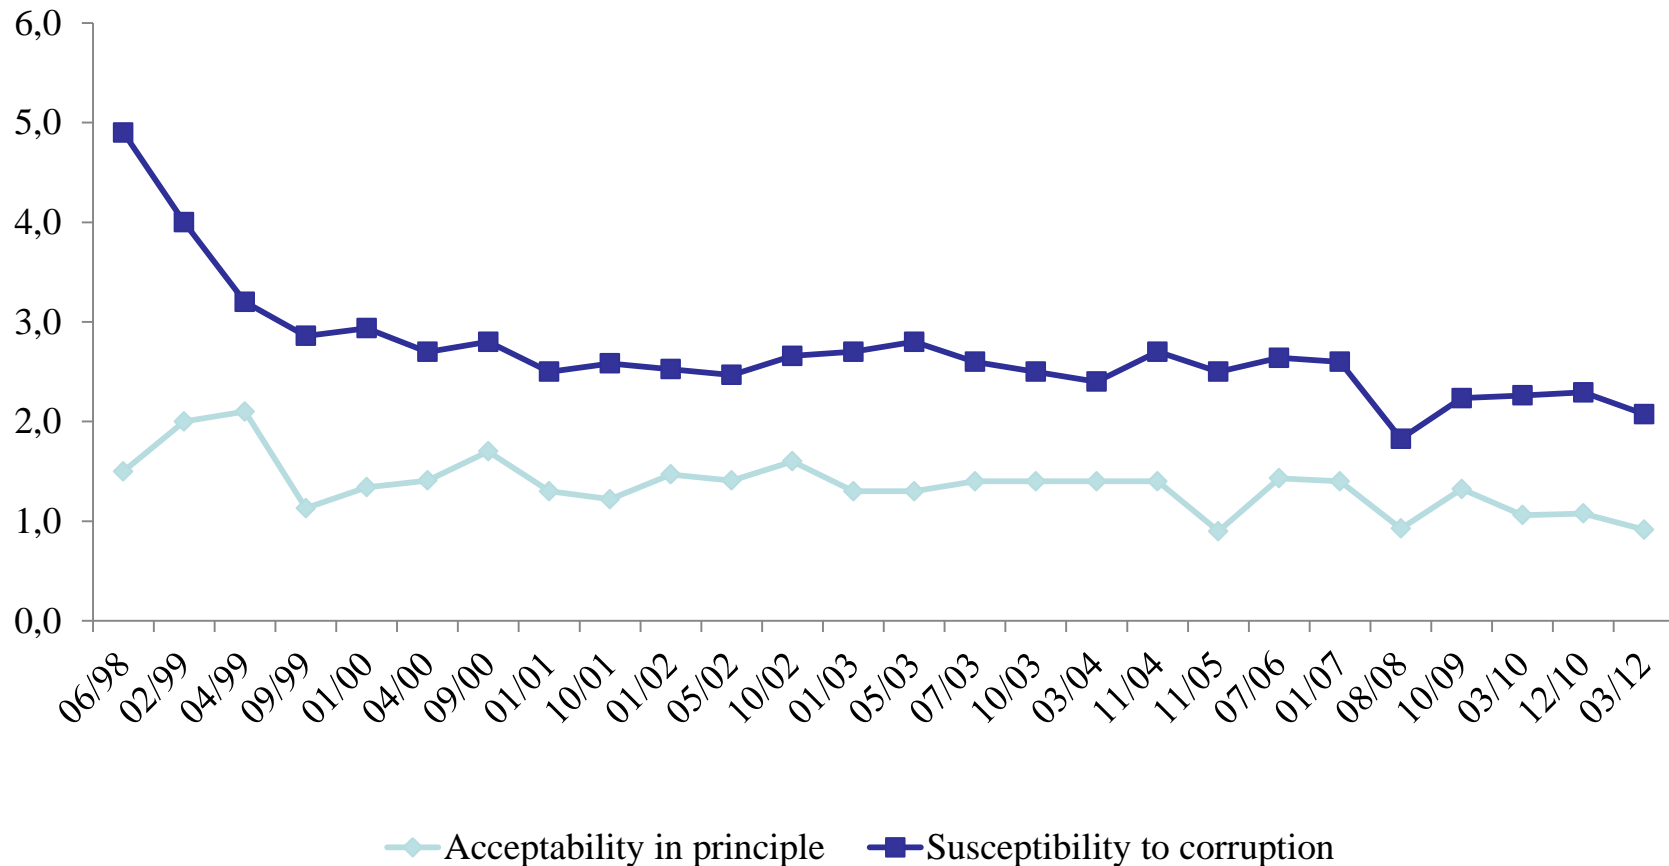

Assessments whether specific activities of MP and public officials and admissible (e.g., free lunch, nepotism, etc.)

Susceptibility

Whether respondents are inclined to give a bribe (as citizens) or receive a bribe (as officials)

# Acceptability and susceptibility to corruption

Experience/  
Victimization

Pressure

- Ask of hint
- Social identity of pressure

Involvement

- Give money, gift or favour
- Value of bribe

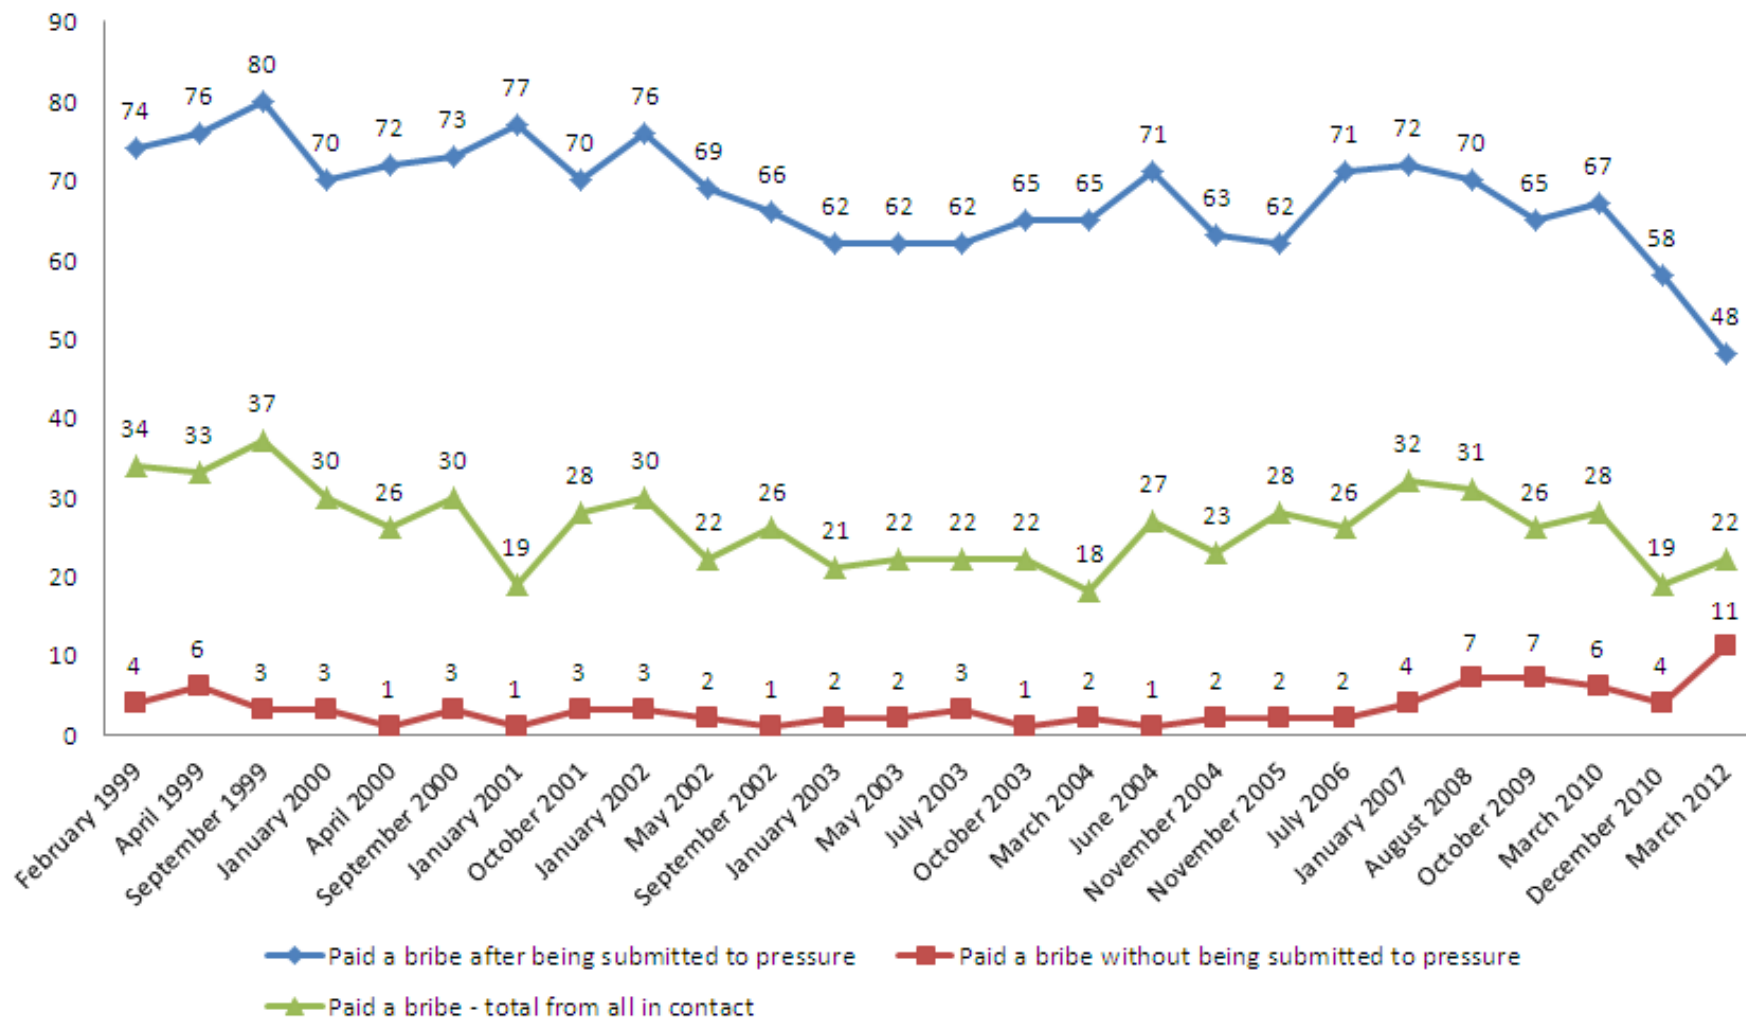

# Involvement in corruption (Bulgaria 1999-2012)

# Participation in corruption and corruption pressure (Bulgaria 1999-2012)

Source: Corruption Monitoring System, Center for the Study of Democracy / Vitosha Research

# Corruption pressure and involvement in corruption (business sector)

Source: Corruption Monitoring System, Center for the Study of Democracy / Vitosha Research

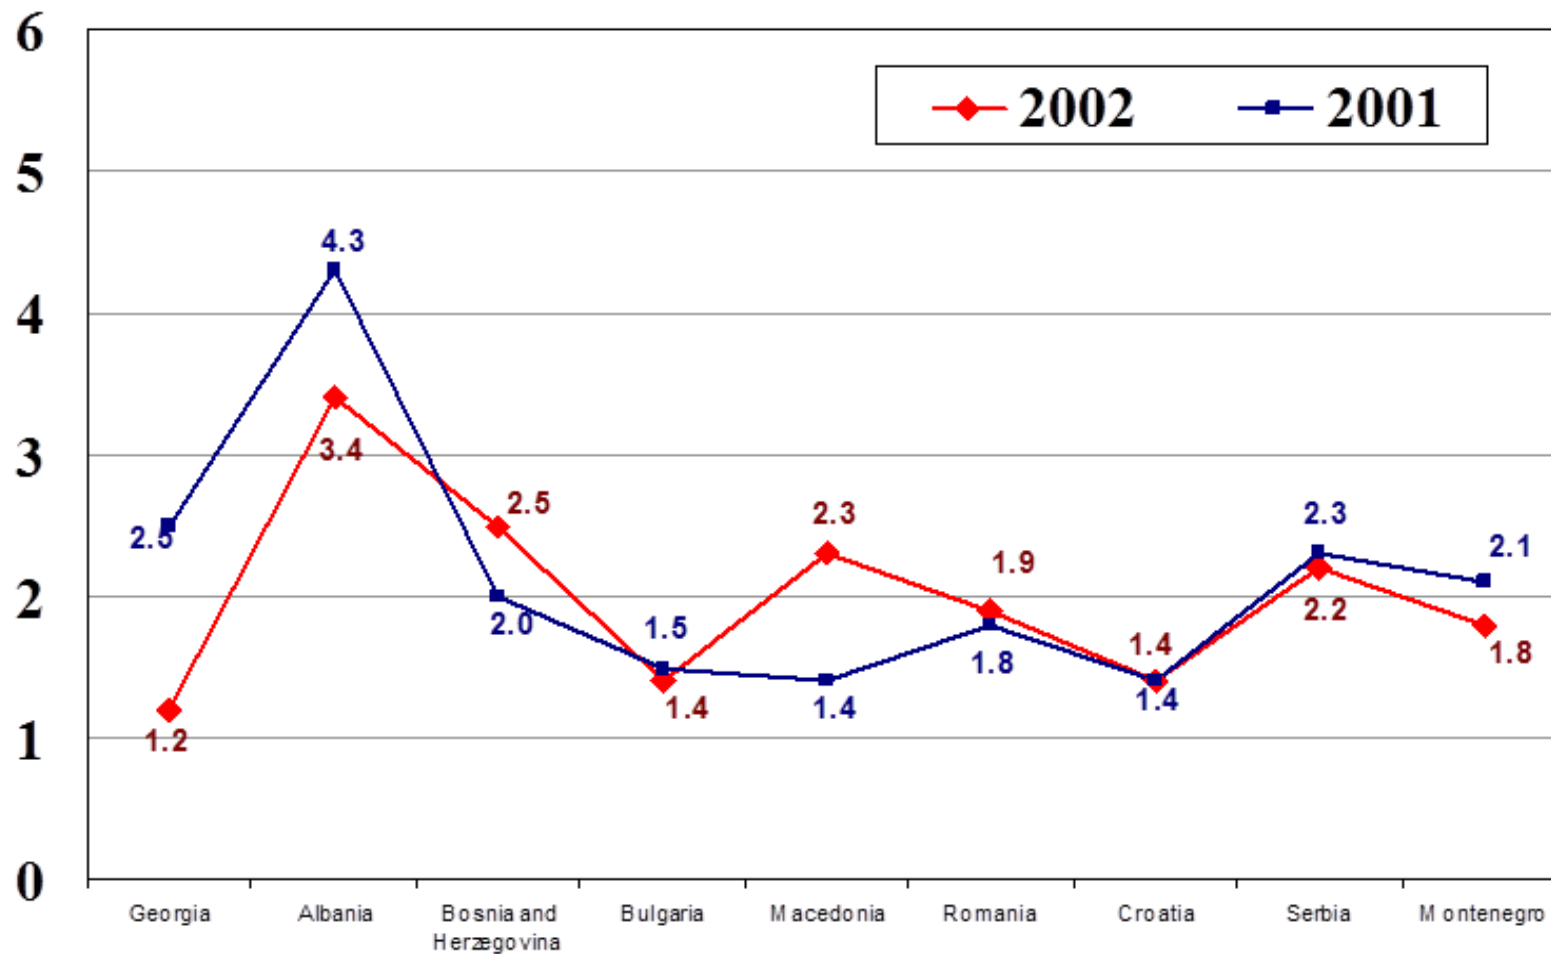

# Corruption pressure (Eurobarometer 2009 and 2011)

In the last 12 months has anyone in our country asked or expected you to pay a bribe for his/her services?

Source: Eurobarometer 2009 and 2011

# Corruption pressure in SEE and Georgia

Perceptions

Overall

Level of corruptness of officials

Efficiency: chance to solve problems through corruption

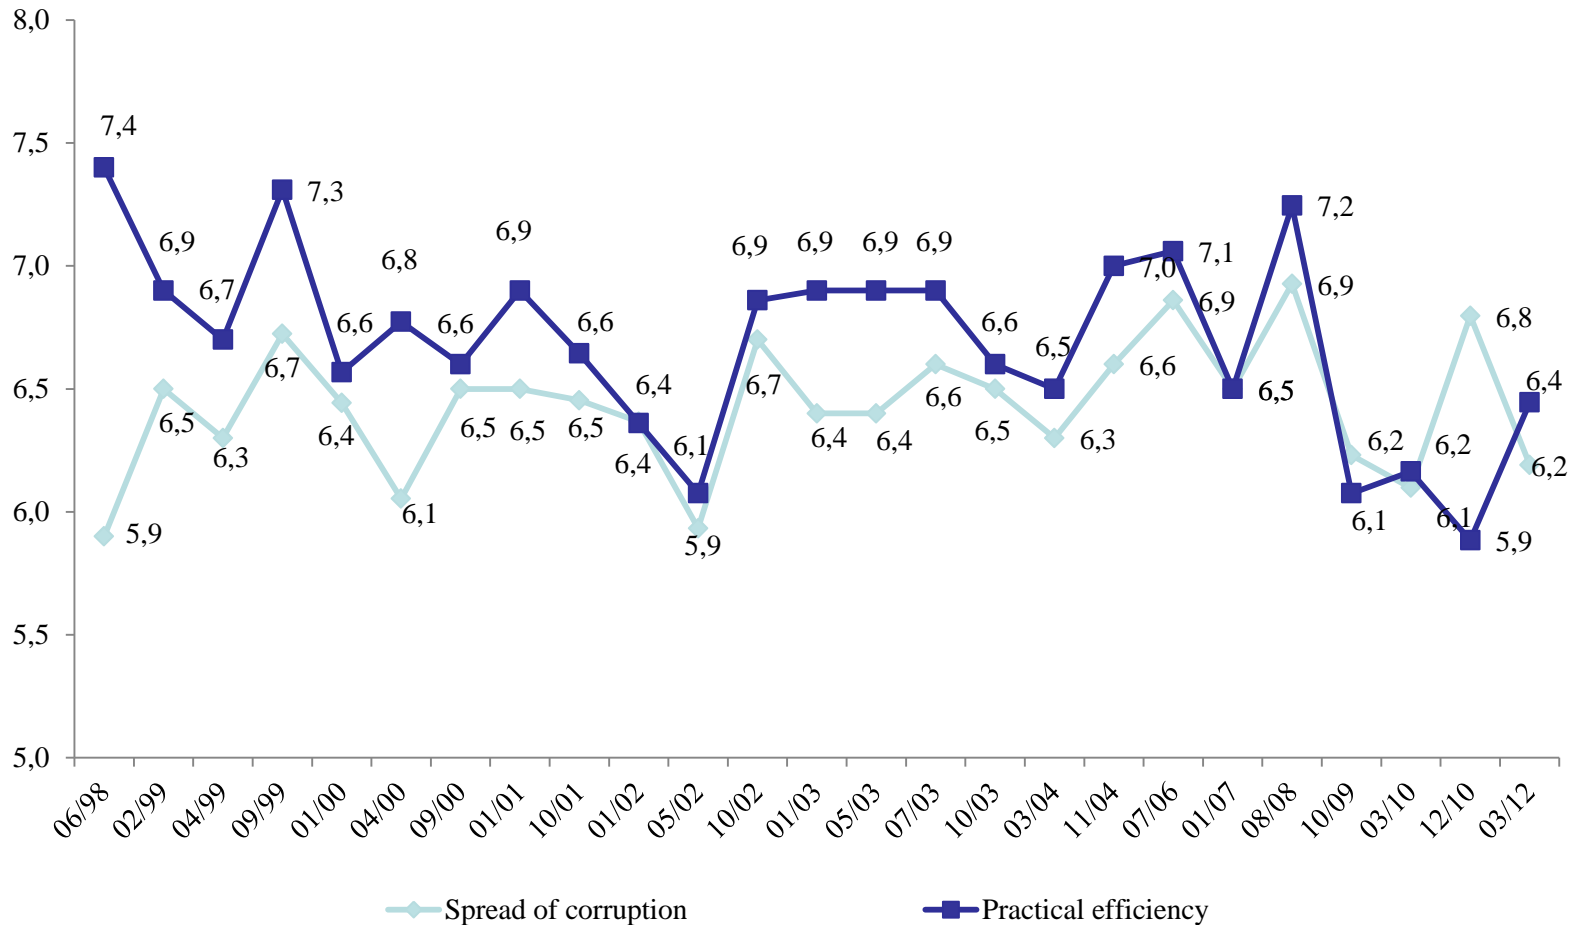

Rankings

Ranking by sectors

Ranking by professional groups

Ranking by institutions

# Spread of corruption and practical efficiency

**Table 1. BiH: Spread of Corruption, 2001 to 2011 Comparison.**

Year	2001	2011	Year	2001	2011
<i>Institution</i>	Index		<i>Profession</i>	%*	
Police	6.96	8.14	Police officers	46.5	69.4
Customs	7.88	7.94	Customs officers	58.8	66.3
Tax Offices	7.66	7.92	Ministers	54.2	63.9
Ministries	7.14	7.88	Tax officials	54.4	61.1
Council of Ministers and the Government	7.78	7.76	Municipal officials	51.4	60.5
Judiciary	6.74	7.74	Officials at ministries	52.5	59.5
Local Government	7.56	7.70	Judges	42.6	59.2
Parliament	7.32	7.40	Municipal councilors	46.2	59.0
Privatization Agency	7.36	7.34	Investigating officers	44.5	58.1
Local Government Administration	7.32	7.34	Admin. officials in the judicial system	41.6	56.7
Audit Office	7.06	7.34	University officials or professors	35.7	56.6
Committee on Energy	6.30	7.26	Public prosecutors	37.8	55.0
Securities and Stock Exchanges Commission	6.70	7.16	Members of Parliament	47.5	54.1
National Telecommunications Company	6.28	7.00	Lawyers	41	47.6
Agency for Foreign Investment	6.46	6.96	Journalists	24.3	34.3
Presidency	7.18	6.84	Teachers	20.9	29.3
Commission for the Protection of Competition	6.84	6.52			
Central Bank	6.44	6.24			
Army	4.78	4.76			

\*Cumulative percentage of those reporting that “almost all” or “most members” of a given professional group engage in corruption.

Countering efforts

Overall  
perspective

Can corruption be  
dealt with?

Effectiveness of  
government  
efforts

In the public sector

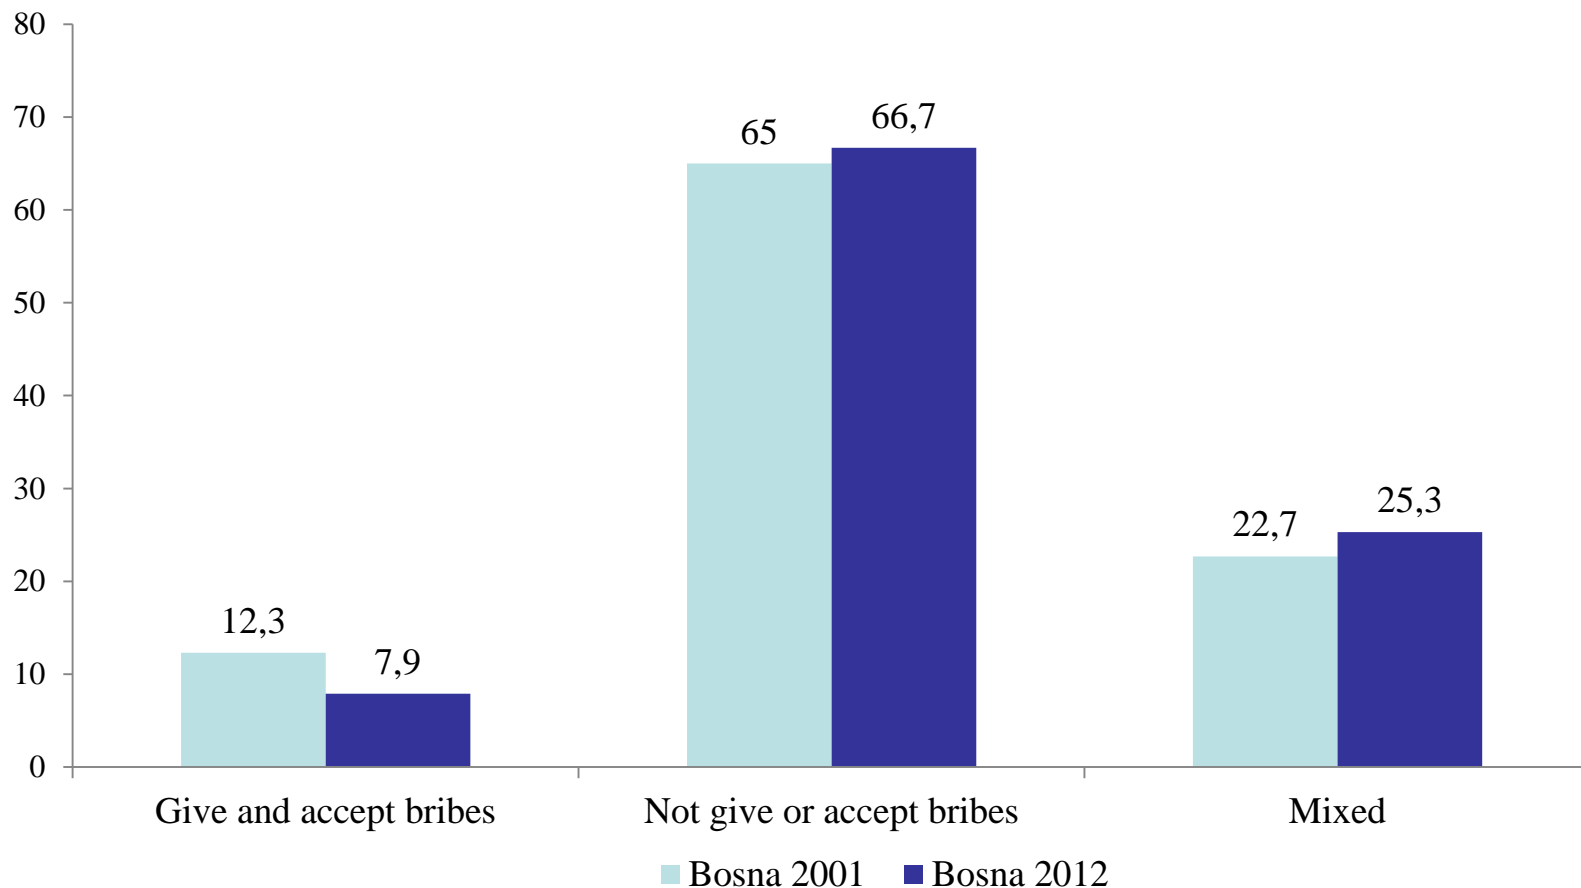

In the private sector

In public procurement

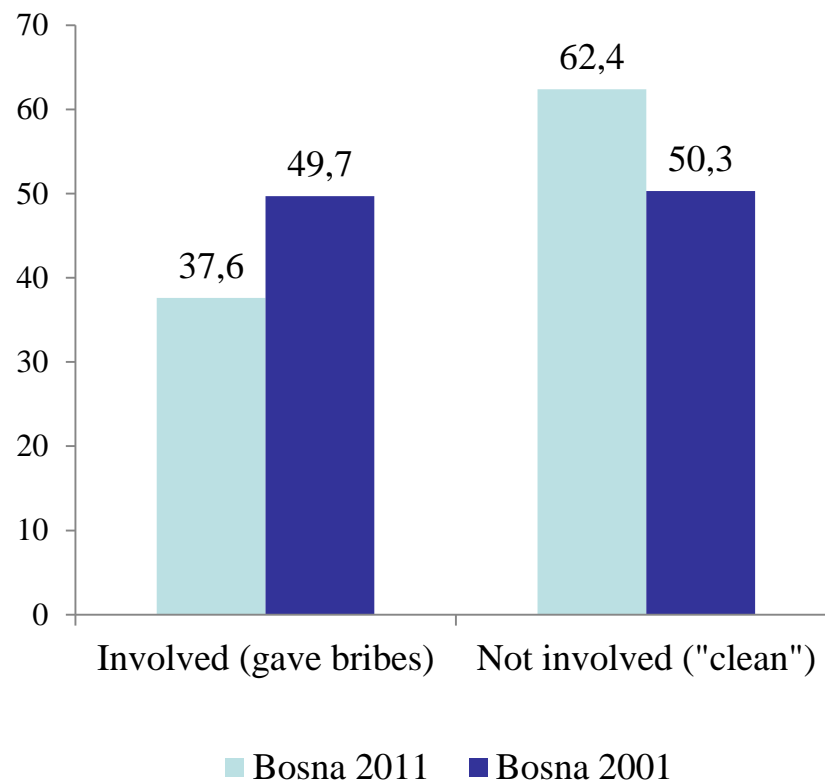

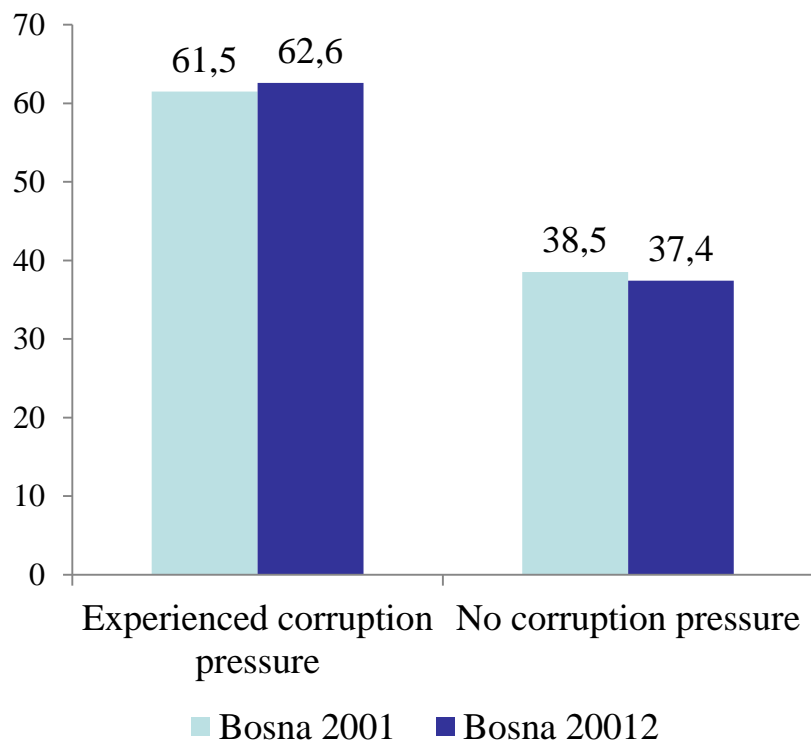

# Evolution of corruption indexes (BiH)

# Susceptibility to corruption Bosnia and Herzegovina (2001 and 2011)

# Corruption pressure and involvement (BiH)

# Pressure and involvement (BiH)

	Involved	Not involved	
Experienced corruption pressure	57.3	42.7	100
No corruption pressure	<b>6.8</b>	93.1	100

Cramer = 0.509, p=0.0
